

IBVF CONFERENCE SERIES 2026

Instituto de Bioquímica Vegetal y Fotosíntesis

Julia Qüesta, 22th January

Centre for Research in Agricultural Genomics (CRAG),
Barcelona, Spain

“Epigenome dynamics in plant developmental transitions”

Nuria Sánchez Coll, 29th January

Centre for Research in Agricultural Genomics (CRAG),
Barcelona, Spain

**“Moonlighting roles of caspase homologs
beyond proteolysis”**

Pablo Manavella, 19th February

Instituto de Hortofruticultura Subtropical y Mediterránea
“La Mayora”, Málaga, Spain

**“Tiny transposons, big effects: How MITEs organize
chromatin to shape gene expression and plant traits”**

Didier Mazel, 27th February

Institut Pasteur, Paris, France

**“From antibiotic resistance to phage defenses: establishing
the properties underlying the adaptive success of integrons”**

Paul Hudson, 05th March

KTH Royal Institute of Technology,
Stockholm, Sweden

**“In vivo screens for accelerating carbon fixation in
cyanobacteria”**

Felix Willmund, 19th March

University of Marburg,
Marburg, Germany

**“Global analysis of heat-induced proteotoxic
stress in plant cells”**

Salón de Grados
